Dear John,

I purchased your speed kit approximately one year ago and I must say that I am very pleased with the performance. I had the wing straps put on, then needed the aircraft for a few days. I noticed a honest 7 kt. increase at 70% cruise. Two weeks later I had the wheel well fairings installed and after 500 hours flying over a years time, there is a definate 15 kt. increase.

By the way, they did not put the aerodynamic sealer on the wing straps, there are probably 2 or 3 more knots there. The numbers show that it has paid for itself in one year.

Feel free to have anyone interested in your kit call me.

Thank You,

Tom Hagan/Pres.
